## CoreWedge EM4102

The CoreWedge software allows users to start using the SDiD 12xx reader out of the box, acting as a keyboard wedge that inserts the tag ID into the active application; this version of the software runs on the SDiD 121X and supports the following tag types:

- **EM4102** – Read Tag ID Only
- **Q5** – Read Tag ID Only

### REQUIREMENTS

1. Microsoft® Windows Mobile 5.0 or higher
2. SDIO Slot
3. SDiD 121X Reader
4. Windows 2000, XP or Vista
5. ActiveSync or Windows Mobile Device Center

### FEATURES

1. Inputs TagID directly into any Windows programs on the PDA as if it was typed in using the keyboard.
2. Options of having 'Enter' suffix after the ID or data is inputted.
3. Compatible with the following tags (depending upon version purchased):
  - a. EM4102
  - b. Q5

**Features and specifications subject to change.**
